## **JISL Overseas Limited**

### **Commentary of the directors** *for the year ended 31 March 2021*

The directors present their commentary together with the audited financial statements of JISL Overseas Limited (the “Company”) for the year ended 31 March 2021.

#### **Principal activity**

The principal activity of the Company is that of investments holding.

#### **Results and dividend**

The results for the year are shown on page 7.

The directors do not recommend the payment of any dividend for the year under review (2020: USD Nil).

#### **Statement of directors’ responsibilities in respect of the financial statements**

Company law requires the directors to prepare financial statements for each financial year giving a true and fair view of the financial position, financial performance and cash flows of the Company. In preparing those financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether International Financial Reporting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors’ responsibilities include: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

The directors have made an assessment of the Company’s ability to continue as a going concern and have no reason to believe that the business will not be a going concern in the year ahead.

#### **Auditors**

The auditors, VBS Business Services, have indicated their willingness to continue in office and will be automatically re-appointed at the next Annual General Meeting of the shareholder.

JISL Overseas Limited

Secretary's certificate  
for the year ended 31 March 2021

We certify that, to the best of our knowledge and belief, the Company has filed with the Registrar of Companies all such returns as are required of the Company under Section 166 (d) of the Companies Act for the year ended 31 March 2021.

## **JISL Overseas Limited**

### **Notes to and forming part of the financial statements for the year ended 31 March 2021**

#### **1. General information**

JISL Overseas Limited (the "Company") was incorporated as a private limited company in Mauritius on 09 November 1994 and holds a Category 1 Global Business Licence. The principal activity of the Company is that of investments holding. The Company's registered office is at C/o Osiris Corporate Solutions (Mauritius) Limited, Chemin Vingt Pieds, 5<sup>th</sup> Floor La Croisette, Grand Baie, Mauritius.

#### **2. Basis of preparation**

##### *(a) Statement of compliance*

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as modified by the exemption from consolidation in the Mauritius Companies Act for companies holding a Category 1 Global Business Licence and comply with the Mauritius Companies Act in so far as applicable to Category 1 Global Business Licenced Companies.

##### *(b) Basis of measurement*

The financial statements have been prepared under the historical cost basis, except that financial assets and financial liabilities are carried at amortised cost.

##### *(c) Functional and presentation currency*

The financial statements are presented in United States Dollar (USD) which is the Company's functional currency.

##### *(d) Use of estimates and judgements*

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect application of accounting policies and the reported amount of assets, liabilities, income and expenses. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future years affected.

#### **3. Changes in significant accounting policies**

During the year under review, the following standards were effective. However, there was no significant impact on the financial statements.

- Definition of Material: Amendments to IAS 1 and IAS 8
- Definition of a Business: Amendments to IFRS 3
- Interest Rate Benchmark Reform: Amendments to IFRS 7, IFRS 9 and IAS 39
- Revised Conceptual Framework for Financial Reporting which will be used in standard-setting decisions

## JISL Overseas Limited

### Notes to and forming part of the financial statements for the year ended 31 March 2021

#### 4. Significant accounting policies

##### (a) Interest income

Interest income is recognised when it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably. Interest is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the asset's net carrying amount on initial recognition.

##### (b) Income tax expense

Income tax expense comprises current and deferred tax. Current tax and deferred tax is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

##### *Current tax*

Current tax is the expected tax payable on the taxable income for the year using tax rates enacted or substantively enacted at the reporting date and any adjustment to tax payable in respect of previous years.

##### *Deferred tax*

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- temporary differences related to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

##### (c) Expenses

All expenses are recognised in the statement of profit or loss and other comprehensive income on an accrual basis.

## JISL Overseas Limited

### Notes to and forming part of the financial statements for the year ended 31 March 2021

#### 4. Significant accounting policies (continued)

##### (d) *Foreign currency transactions*

Transactions in foreign currencies are translated at the exchange rate ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to United States Dollar (USD) at the foreign exchange rate ruling at that date. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of transaction. Foreign exchange differences arising on translation are recognised in profit or loss.

##### (e) *Investments in subsidiaries*

Subsidiaries are entities controlled by the Company. The Company controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Investments in subsidiaries are initially shown at cost. Where an indication of impairment exists, the recoverable amount of the investment is assessed. Where the carrying amount of an investment is greater than its recoverable amount, it is written down immediately to its recoverable amount and the difference is charged to profit or loss.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to profit or loss.

##### (f) *Consolidated financial statements*

The Company owns 54.53% in Jain Europe Ltd, UK and 69.45% in Jain America Holding Inc. The Company has taken advantage of the exemption provided by the Mauritius Companies Act allowing a wholly owned or virtually wholly owned parent company holding a Category 1 Global Business Licence not to present consolidated financial statements. The financial statements are separate financial statements which contain information about JISL Overseas Limited as an individual company and do not contain consolidated financial information as the parent of a group.

##### (g) *Related parties*

For the purposes of these financial statements, parties are considered to be related to the Company if they have the ability, directly or indirectly, to control the Company or exercise significant influence over the Company in making financial and operating decisions, or vice versa, or where the Company is subject to common control or common significant influence. Related parties may be individuals or other entities.

##### (h) *Provisions*

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made.

## JISL Overseas Limited

### Notes to and forming part of the financial statements for the year ended 31 March 2021

#### 4. Significant accounting policies (continued)

##### (i) Financial instruments

##### (i) Recognition and initial measurement

- (a) All financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.
- (b) A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

##### (ii) Classification and subsequent measurement and gains and losses

##### *Financial assets*

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income – debt investment; fair value through other comprehensive income – equity investment; or fair value through profit or loss. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through profit or loss:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at fair value through other comprehensive income if it meets both of the following conditions and is not designated as at fair value through profit or loss:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

4. Significant accounting policies (continued)

(i) *Financial instruments (continued)*

(ii) *Classification and subsequent measurement and gains and losses (continued)*

*Financial assets – Business model assessment*

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

*Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest*

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

JISL Overseas Limited

Notes to and forming part of the financial statements  
for the year ended 31 March 2021

4. Significant accounting policies (continued)

(i) Financial instruments (continued)

(ii) Classification and subsequent measurement and gains and losses (continued)

*Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest (continued)*

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated initial as consistent with this criterion if the fair value of the prepayment feature is insignificant at recognition.

*Financial assets – Subsequent measurement and gains and losses*

Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
------------------------------------	--

*Financial liabilities – Classification, subsequent measurement and gains and losses*

Financial liabilities are classified as measured at amortised cost or fair value through profit or loss. A financial liability is classified as at fair value through profit or loss if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at fair value through profit or loss are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

(iii) Derecognition

*Financial asset*

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

JISL Overseas Limited

Notes to and forming part of the financial statements  
for the year ended 31 March 2021

4. Significant accounting policies (continued)

(i) Financial instruments (continued)

(iii) Derecognition (continued)

*Financial liability*

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

(iv) Offsetting

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position when, and only when, the Company has a legal right to set off the recognised amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRSs, for example, for gains and losses arising from a group of similar transactions, such as gains and losses from financial instruments at fair value through profit or loss.

(v) Fair value measurement principles

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date.

The Company measures the fair value of an instrument, using valuation techniques that minimise the use of relevant observable inputs and minimise the use of unobservable inputs, if there is no quoted price in an active market. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

(vi) Impairment

*Non-derivative financial assets*

The Company recognises loss allowances for ECLs on:

- financial assets measured at amortised cost;

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

## JISL Overseas Limited

Notes to and forming part of the financial statements  
for the year ended 31 March 2021

### 4. Significant accounting policies (continued)

#### (j) Stated capital

Ordinary shares are classified as equity.

#### (k) New standards, interpretations and amendments to existing standards in issue but not yet effective

At date of authorisation of these financial statements, the following relevant standards were in issue but effective on annual period beginning on or after the respective dates as indicated.

#### *Classification of Liabilities as Current or Non-current – Amendments to IAS 1*

The narrow-scope amendments to IAS 1 Presentation of Financial Statements clarify that liabilities are classified as either current or noncurrent, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the expectations of the entity or events after the reporting date (example: the receipt of a waiver or a breach of covenant). The amendments also clarify what IAS 1 means when it refers to the 'settlement' of a liability. The amendments could affect the classification of liabilities, particularly for entities that previously considered management's intentions to determine classification and for some liabilities that can be converted into equity. They must be applied retrospectively in accordance with the normal requirements in IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors. In May 2020, the IASB issued an Exposure Draft proposing to defer the effective date of the amendments to 1 January 2023.

The effective date of the above standard is originally 01 January 2022 (likely to be deferred to 01 January 2023)

#### *Onerous Contracts – Cost of Fulfilling a Contract Amendments to IAS 37*

The amendment to IAS 37 clarifies that the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to fulfilling contracts. Before recognising a separate provision for an onerous contract, the entity recognises any impairment loss that has occurred on assets used in fulfilling the contract.

The effective date of the above standard is 01 January 2022

#### *Reference to the Conceptual Framework – Amendments to IFRS 3*

Minor amendments were made to IFRS 3 *Business Combinations* to update the references to the *Conceptual Framework for Financial Reporting* and add an exception for the recognition of liabilities and contingent liabilities within the scope of IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* and Interpretation 21 *Leases*. The amendments also confirm that contingent assets should not be recognised at the acquisition date.

The effective date of the above standard is 01 January 2022

#### *Annual Improvements to IFRS Standards 2018–2020*

The following improvements were finalised in May 2020:

- IFRS 9 *Financial Instruments* – clarifies which fees should be included in the 10% test for derecognition of financial liabilities.

## JISL Overseas Limited

### Notes to and forming part of the financial statements for the year ended 31 March 2021

#### 4. Significant accounting policies (continued)

- (k) *New standards, interpretations and amendments to existing standards in issue but not yet effective (continued)*

##### *Annual Improvements to IFRS Standards 2018–2020 (continued)*

- IFRS 1 First-time Adoption of International Financial Reporting Standards allows entities that have measured their assets and liabilities at carrying amounts recorded in their parent's books to also measure any cumulative translation differences using the amounts reported by the parent. This amendment will also apply to associates and joint ventures that have taken the same IFRS 1 exemption.

The effective date of the above standard is originally 01 January 2022.

There are no other IFRS's or IFRIC's interpretations that are not yet effective that would be expected to have a material impact on the Company.

#### 5. Critical accounting estimates and judgments

The Company makes estimates and judgments that affect the reported amounts of assets and liabilities within the next year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

##### *Judgements*

In the process of applying the Company's accounting policies, management has made the following judgements which have the most significant effect on the amounts recognised in the financial statements.

##### *Going Concern*

In early 2020, the emergence of the Covid-19 (Coronavirus) pandemic has led to significant volatility and declines in the global markets. The directors are monitoring the evolving situation closely and evaluating its potential exposure and believe that Covid-19 did not have any material impact on the Company's operations at reporting date.

##### *Determination of functional currency*

The determination of the functional currency of the Company is critical since recording of transactions and exchange differences arising thereon are dependent on the functional currency selected. As described in Note 2(c), the directors have considered those factors therein and have determined that the functional currency of the Company is the USD.

#### 6. Income tax expense

The Company, being resident in Mauritius, is liable to income tax in Mauritius on its chargeable income at the rate of 15%. The Company has received its Category 1 Global Business Licence ("GBLI") before 16 October 2017 and is grandfathered under the provisions of the Finance (Miscellaneous Provisions) Act 2018 ("FA 2018"). As from 01 July 2021, the Company's GBLI licence will be automatically converted to a Global Business Licence ("GBL"). The Company will therefore operate under the current tax regime up to 30 June 2021.

Until 30 June 2021, the Company's foreign sourced income is eligible for a foreign tax credit which is computed as the higher of the Mauritian tax and the foreign tax on the respective foreign sourced income. The foreign tax for a GBLI company is based on either the actual foreign tax charged by the foreign jurisdiction or a deemed foreign tax. The deemed amount of foreign tax is based on 80% of the Mauritian tax on the relevant foreign sourced income. In computing its total actual foreign tax credit, the Company is allowed to pool all its foreign sourced income.

Notes to and forming part of the financial statements  
for the year ended 31 March 2021

6. Income tax expense (continued)

Under the new regime, the Company will be able to claim a 80% partial exemption on specific types of income (including foreign dividends and interest), subject to meeting pre-defined substance conditions. As an alternative to the exemption, the Company can claim a tax credit against its Mauritius tax liability based on actual foreign tax charged.

No provision for income tax has been made in the financial statements as the Company has accumulated tax losses amounting to USD 1,642,201 as at 31 March 2021 (2020: USD 1,235,596). The accumulated tax losses are available for set off against future taxable profits as shown below:

	USD
<i>Up to years ending:</i>	
31 March 2023	408,834
31 March 2024	411,217
31 March 2025	415,545
31 March 2026	406,605
	<u>1,642,201</u>

*Recognised in the statement of profit or loss and other comprehensive income*

	2021 USD	2020 USD
Current income tax	-	-
<i>Reconciliation of effective tax</i>		
Loss before tax	(406,605)	(415,534)
Income tax at 15 %	(60,991)	(62,330)
Less exempt income	-	(2)
Foreign tax credit	48,793	49,866
Deferred tax not recognised	12,198	12,466
Income tax expense	-	-

*Deferred tax*

The temporary difference on which a deferred tax asset has not been recognised at 31 March 2021 amounting to USD 49,266 (2019: USD 37,068) relates to accumulated tax losses.

## Fees paid to key management personnel

Professional fees of USD 2,420 have been incurred by the Company for the year ended 31 March 2021 (2020: USD 5,650) in relation to directorship services rendered by the resident directors. However, these fees are not paid to individual director but to the Company's administrator.

# 12. Financial instruments and associated risks

## Overview

The Company has exposure to the following risks from its use of financial instruments:

- Market risk
- Credit risk
- Liquidity risk

The Board of Directors has the overall responsibility for the determination of the Company's risk management objectives and policies. The Company's overall risk management policies focuses on the volatility of financial markets and seeks to minimise potential adverse effects on the Company's financial performance and flexibility. The Company's activities expose it to a variety of financial risks; market risk, credit risk and liquidity risk.

The Company's financial instruments comprise of cash and cash equivalents, loan from related party and other payables.

**JISI Overseas Limited**

Notes to and forming part of the financial statements  
for the year ended 31 March 2021

**12. Financial instruments and associated risks (continued)**

*Market risk (continued)*

Market risk represents the potential loss that can be caused by a change in the market value of financial instruments. The Company's exposure to market risk is determined by a number of factors, including interest rates, foreign currency exchange rates and market volatility.

*Interest rate risk*

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. The Company's operations are subject to the risk of interest rate fluctuations to the extent that interest-earning assets and interest-bearing liabilities mature or are repriced at different times or in different amounts. In the case of floating rate assets and liabilities the Company is also exposed to basis risk, which is the difference in repricing characteristics of the various floating rate indices, such as the base lending rate and different types of interest.

At the reporting date, the interest rate profile of the Company's interest-earning and interest bearing financial instruments were:

	2021 USD	2020 USD
<b>Variable rate instruments</b>		
<i>Financial asset</i>		
Cash and cash equivalents	3,562	1,596
<b>Fixed rate instruments</b>		
<i>Financial liability</i>		
Loan from related parties	(5,210,000)	(5,200,000)

The table below indicates the approximate change in the Company's post-tax profit and equity in response to reasonable possible changes in the interest rates to which the Company has significant exposure at the reporting date.

	Increase/ (decrease) in interest rates	Effect on post tax profit and equity	
		2021 USD	2020 USD
Increase in interest rate	+0.1%	-	2
Decrease in interest rate	-0.1%	-	(2)

*Currency risk*

Foreign exchange risk is the risk that the fair value of future cash flows of financial instrument will fluctuate because of changes in foreign exchange rate. The Company's significant financial assets and liabilities are denominated in its functional currency, the United States Dollar ("USD"). Consequently, the Company is not exposed to such risk.

## JISL Overseas Limited

Notes to and forming part of the financial statements  
for the year ended 31 March 2021

### 12. Financial instruments and associated risks (continued)

#### Credit risk

Credit risk represents the potential loss that the Company would incur if counter parties fail to perform pursuant to the terms of their obligations to the Company.

The Company's credit risk arises from cash and cash equivalents. The Company's policy over credit risk is to minimise its exposure to counterparties with perceived higher risk of default by dealing only with counterparties having a good credit rating and management does not expect counterparties to fail to meet their obligations. The Company's policy is to maintain its cash balances with a reputed banking institution and to monitor the placement of cash balances on an ongoing basis.

At the reporting date, the Company's exposure to credit risk was as follows:

	2021 USD	2020 USD
Cash and cash equivalents	3,562	1,596

Impairment on cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties.

The exposure to credit risk on cash and cash equivalents is monitored on an ongoing basis by management and it is considered recoverable.

#### Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure that it will always have sufficient liquidity to meet its liabilities when they become due without incurring unacceptable losses or risking damage to the Company's reputation.

The following are the contractual maturities of financial liabilities:

	Less than 1 year USD	Repayable upon demand USD	Total USD
<b>31 December 2021</b>			
Financial liabilities			
Loan from related parties	-	5,210,000	5,210,000
Other payables	1,654,752	-	1,654,752
<b>Total financial liabilities</b>	<b>1,654,752</b>	<b>5,210,000</b>	<b>6,864,752</b>
<b>31 December 2020</b>			
Financial liabilities			
Loan from related party	-	5,200,000	5,200,000
Other payables	1,256,931	-	1,256,931
<b>Total financial liabilities</b>	<b>1,256,931</b>	<b>5,200,000</b>	<b>6,456,931</b>

## JISL Overseas Limited

Other payables	-	1,256,931	1,256,931
Total financial liabilities not measured at fair value	-	6,456,931	6,456,931

### 13. Capital risk management

The Company's primary objective when managing capital is to safeguard the Company's ability to continue as a going concern. The Company defines "capital" as including all components of equity. The Company's capital structure is regularly reviewed and managed with due regard to the capital management practices of the Company. Adjustments are made to the capital structure in light of changes in economic conditions affecting the Company. The results of the directors' review of the Company's capital structure are used as a basis for the determination of the level of dividends, if any, that are declared.

### 14. Holding and ultimate holding company

The directors regard Jain Irrigation System Limited, a company incorporated in India, as the Company's immediate and ultimate holding company.

### 15. Events after the reporting date

There have been no material events after the reporting date which would require disclosure or adjustments to the financial statements for the year ended 31 March 2021.
