# Tree House – BUY

18 February 2015

## Poised for growth

We initiate coverage on Tree House with BUY and TP of Rs579. Tree House runs one of India's largest self-operated pre-school chains. With just 1.1% enrolment in pre-schools in India, increase in penetration presents a significant opportunity. Tree House is well positioned to benefit from this penetration considering its strong brand recall. Tree House owns the land and building in five K-12 schools, which it plans to monetise by March 2017 (the company has already sold one, entered an MoU to sell another and we build in land and building sale in the others by March 2017). If this materialises, ROCE should increase from the current 16% to  $\sim 25\%$ .

**Market leader in self-operated pre-schools**: Tree House had 562 centres as of December 31, 2014 across 80 cities out of which 459 were self-operated pre-schools. According to the company, advantages of self-operated schools include higher engagement with parents, better cost efficiency, and better branding. Tree House also provides school management services to 24 K-12 schools. The pre-school segment contributed 86% to FY14 revenue.

The company targets 1100 self-operated pre-schools in the next three years: Low barriers to entry along with the increasing awareness, popularity, and propensity of young working professionals to pay are likely to drive growth for the pre-school market. According to industry estimates, this market is expected to grow at 26% Cagr over five years. Tree House spends Rs3.5m-7m per school on capex. Schools turn Ebitda positive at ~30 students. Within 24 months, if a location has been chosen well, Ebitda margin exceeds 50%. We are building in 804 self-operated pre-schools by end-FY17.

We estimate 31% EPS Cagr over FY15-17ii; BUY with Rs579 TP: In five of the 24 K-12 schools, Tree House owns the land and building. This has resulted in Rs1.1bn capital employed on its books. The company targets to sell all five (one has been sold and the MoU for sale of another has been announced) by March 2017. The company states that security deposits worth Rs1.2bn made to K-12 school trusts would also be repaid by FY18. The stock is trading at 26x one-year forward PE vs. 22x historical average. Our Rs579 TP is based on 24x multiple.

## **Company snapshot**

Tree House is a player in the pre-school education space and has one of India's largest self-operated pre-school chains. Tree House offers playgroup, nursery, junior KG, senior KG, day care services, teacher training, summer camp and activity/hobby class services. It had 562 centres as of December 31, 2014 across 80 cities out of which 459 were self-operated pre-schools. It added 72 centres in 9MFY15. Total staff strength stood at 2,179 and the company operated 21 teacher-training centres.

Tree House also provides school management services to 24 K-12 schools. It provides a range of educational services to K-12 schools, which include designing curriculum and providing teaching aids, supplying methods for imparting education, organising extracurricular activities for students and teacher training.

The streams of revenue are: 1) admission and tuition fee in selfoperated pre-schools; 2) one-time upfront fee and annual service fee in franchise-run pre-schools; and 3) service/consultancy fee based on admission in K-12 schools.

#### Background

Rajesh Bhatia, who previously worked in financial services and consulting, promoted Tree House. The first school was set up in Mumbai in FY03. In FY09, Tree House entered the K-12 segment and started day care centres. It went public in August 2011 through an IPO of Rs1.12bn. In FY13, it issued Rs412m equity to Omidyar Network and Aditya Birla Private Equity. In FY14, it acquired Brainworks, a player in the preschool space, for Rs50m. In December 2014, it raised Rs2bn through a QIP.

## Market leader in self-operated pre-schools

**Pre-school market expected to grow at 26% Cagr over five years**: The Indian pre-school market is experiencing rapid growth due to rising number of working mothers, increasing trend of nuclear families, and escalating demand for high quality pre-school education for toddlers. The pre-school industry has low market penetration with 1.1% enrolment in India compared with France with 100% enrolment. Low barriers to entry along with the increasing awareness, popularity, and propensity of young working professionals to pay are likely to drive growth for the pre-school market.

CRISIL expects the share of organised pre-schools to increase from 20% in FY13 to 26% in FY18. This implies that organised pre-school market is expected to grow at 26% Cagr from Rs13.3 billion to Rs42.8 billion over this period.

**Tree House focuses on self-operated schools unlike peers**: More than 80% of Tree House's 562 pre-schools are self-operated and the rest are through franchisees. This is in sharp contrast to competitors such as Zee Learn (1300 schools) and Bachpan that have adopted the

franchise model for most of their schools. According to the company, the advantages of self-operated schools are higher engagement with parents, better cost efficiency, and better branding. The franchisee model is limited to places with difficult access.

**Tree House achieves Ebitda break even in 12-14 months**: The economics of self-operated pre-schools are as follows

- Tree House maintains 14:1 student to teacher ratio.
- The average annual fee comes to Rs40,000-Rs45,000 per student.
- The key cost items are rental costs (all pre-schools operate on rented premises), wages paid to teachers and maids, and utility costs, all of which are fixed.
- Tree House spends Rs3.5 to Rs7m per school on capex.

Schools turn Ebitda positive at ~30 students. Within 24 months, if location has been chosen well, Ebitda margin exceeds 50%.

The table below summarises the P&L of a school with 75 students and capex of Rs5m.

Figure 7: Sample P&L for Tree House's self-operated pre-school

| Item  | Value     |
|---|-----------|
| Students per pre-school                                     | 75        |
| Annual fee per student (Rs)                                 | 40,000    |
| Annual fee revenue (Rs)                                     | 3,000,000 |
| Annual utility + rental+ admin costs (Rs)                   | 1,100,000 |
| Student teacher ratio*                                      | 20        |
| Number of teachers  | 4         |
| Cost per teacher per annum (Rs)                             | 84,000    |
| Teacher salary bill (Rs)                                    | 336,000   |
| Total wage bill (Rs) (adding another 10% for support staff) | 369,600   |
| Ebitda (Rs)   | 1,540,400 |
| Ebitda %  | 51%       |
|   |           |
| Capital employed (Rs)                                       | 5,000,000 |
| Depreciation (assuming 10 years useful life) (Rs)           | 500,000   |
| Ebit (Rs)   | 1,040,000 |
| ROCE  | 21%       |

Source: Company, IIFL Research; \*we take student teacher ratio of 20:1 vs. 14:1 to account for double shifts in many schools

Fee per student in franchisee schools is  $\sim$ 50% that of self-operated schools. Franchisees pay one-time licence fee of Rs700k-Rs1.5m + 15-20% royalty only on tuition fee to Tree House.

We build in 300 self-owned pre-school additions in FY16 and FY17 and 30% revenue Cagr: Tree House intends to take self-operated pre-school count to 1100 over the next three years. We estimate self-operated pre-schools to increase from the current 459 to 804 by end-FY17. This would entail 30% revenue Cagr over FY15-17.

# K-12 school count to be held constant; land to be sold

**Tree House has 24 K-12 schools - 19 without land, 5 with land**: Tree House decided to expand into K-12 segment in 2008 with its preschools serving as feeders to these schools. It has since expanded to 24 schools. In five of these schools, Tree House owns land and building. In all 24 schools, it receives school management fee.

The number of K-12 schools is not going to increase in the near future as Tree House has created sufficient capacity for now. It has 15,000 students in its K-12 schools vs. 46,000 capacity. It will take some time for this to ramp up as students gradually move up to higher grades.

The services rendered include admission, administration, examination, school bus, laboratory, recruitment, and content management. Though the actual fee may be depend on the paying ability of the trust, the location of the school, etc. Tree House receives ~22% of the trust's revenue (which itself consists of admission, tuition and school bus fee

paid by students). With each support service being chargeable, this may increase to 28-30% of trust revenue over time.

Land to be sold and capital employed to be brought down: Tree House has invested ~Rs300m for refurbishment of schools. It has extended Rs1.2bn as security deposits to the school trusts. The land and building for five schools worth Rs1.1bn on its books. All this resulted in ~Rs2.5bn capital employed in the K-12 business (>50% of the total capital employed).

#### Figure 9: K-12 segment has Rs2.5bn capital employed...

Source: Company, IIFL Research

**Tree House aims to sell land and building in all five schools by end-FY17:** Out of five schools, land and building in one has already been sold in January 2015 for ~Rs170m (vs. Rs140m book value). It has announced MoU for sale of land and building pertaining to another school for Rs525m. The company expects to sell land and building in the remaining four schools in the next two years that is expected to yield ~Rs1.4bn (including Rs170m from the one already sold). We build in sale of land and building by end of FY17. Security deposits worth Rs1.2bn would also be repaid by FY18 according to the company.

Our assumptions and projections are as follows:

## Figure 11:We estimate 40%+ revenue Cagr for K-12 segment

The opinions expressed are our current opinions as of the date appearing in the material and may be subject to change from time to time without notice. IIFL or any persons connected with it do not accept any liability arising from the use of this document. The recipients of this material should rely on their own judgment and take their own professional advice before acting on this information.

IIFL or any of its connected persons including its directors or subsidiaries or associates or employees shall not be in any way responsible for any loss or damage that may arise to any person from any inadvertent error in the information contained, views and opinions expressed in this publication.

IIFL and/or its affiliate companies may deal in the securities mentioned herein as a broker or for any other transaction as a Market Maker, Investment Advisor, etc. to the issuer company or its connected persons. IIFL generally prohibits its analysts from having financial interest in the securities of any of the companies that the analysts cover. In addition, the company prohibits its employees from conducting Futures & Options transactions or holding any shares for a period of less than 30 days.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment of its original date of publication by IIFL and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments.

Analyst Certification: (a) that the views expressed in the research report accurately reflect such research analyst's personal views about the subject securities and companies; and (b) that no part of his or her compensation was, is, or will be directly or indirectly related to the specific recommendation or views contained in the research report.

#### Key to our recommendation structure

**BUY** - Absolute - Stock expected to give a positive return of over 20% over a 1-year horizon.

SELL - Absolute - Stock expected to fall by more than 10% over a 1-year horizon.

In addition, **Add** and **Reduce** recommendations are based on expected returns relative to a hurdle rate. Investment horizon for **Add** and **Reduce** recommendations is up to a year. We assume the current hurdle rate at 10%, this being the average return on a debt instrument available for investment.

Add - Stock expected to give a return of 0-10% over the hurdle rate, i.e. a positive return of 10%+.

Reduce - Stock expected to return less than the hurdle rate, i.e. return of less than 10%.

Distribution of Ratings: Out of 179 stocks rated in the IIFL coverage universe, 110 have BUY ratings, 8 have SELL ratings, 33 have ADD ratings and 28 have REDUCE ratings.

**Price Target:** Unless otherwise stated in the text of this report, target prices in this report are based on either a discounted cash flow valuation or comparison of valuation ratios with companies seen by the analyst as comparable or a combination of the two methods. The result of this fundamental valuation is adjusted to reflect the analyst's views on the likely course of investor sentiment. Whichever valuation method is used there is a significant risk that the target price will not be achieved within the expected timeframe. Risk factors include unforeseen changes in competitive pressures or in the level of demand for the company's products. Such demand variations may result from changes in technology, in the overall level of economic activity or, in some cases, in fashion. Valuations may also be affected by changes in taxation, in exchange rates and, in certain industries, in regulations. Investment in overseas markets and instruments such as ADRs can result in increased risk from factors such as exchange rates, exchange controls, taxation, and political and social conditions. This discussion of valuation methods and risk factors is not comprehensive – further information is available upon request.
